

Customer empathy maps

An empathy map is a visual tool used to understand a user's thoughts, feelings, actions, and challenges by viewing a problem from the user's perspective.

It helps teams identify real user needs and design solutions that address actual pain points effectively.

CUSTOMER JOURNEY MAP – PS-1 (EMPLOYEE)

Journey of an employee who wants to request licensed software for their job role.

CUSTOMER JOURNEY MAP – PS-2 (IT ADMINISTRATOR)

Journey of an IT Administrator who manages and approves licensed software requests
