| Date          | 27 June2026                                                               |
| Team ID       |                                                                           |
| Project Name  | Licensed Software Installation Request Management System using ServiceNow |
| Maximum Marks |                                                                           |

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)           |
|--------|-------------------------------|----------------------------------------------|
| FR-1   | User Access (Employee)        | Login through ServiceNow Portal              |
|        |                               | Role-based access for Employee               |
| FR-2   | Software Request Submission   | Select licensed software                     |
|        |                               | Choose software version                      |
|        |                               | Provide business justification               |
|        |                               | Submit software request                      |
| FR-3   | Approval Workflow             | Manager approval                             |
|        |                               | Auto-escalation on delay                     |
|        |                               | Approval / Rejection comments                |
| FR-4   | License Validation            | Check license availability                   |
|        |                               | Prevent request if license unavailable       |
| FR-5   | Software Fulfillment          | Assign task to IT Support                    |
|        |                               | Install approved software                    |
| FR-6   | Notifications                 | Email on request submission                  |
|        |                               | Email on approval / rejection                |
|        |                               | Email on fulfillment completion              |
| FR-7   | Request Tracking              | View request status<br>View approval history |

## Non-Functional Requirements

| FR No. | Non-Functional Requirement | Description                                                                                                                                                        |
|--------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| NFR-1  | Usability                  | The system should provide a simple and intuitive ServiceNow portal interface so employees can easily submit and track licensed software requests without training. |
| NFR-2  | Security                   | The system must ensure secure access using role-based permissions so only authorized users (employees, managers, IT admins) can view or act on software requests.  |
| NFR-3  | Reliability                | The system should reliably process software requests and approvals without data loss, even during high usage.                                                      |
| NFR-4  | Performance                | The system should load request forms, approval pages, and status updates within acceptable response times.                                                         |
| NFR-5  | Availability               | The system should be available during business hours with minimal downtime to ensure uninterrupted request handling.                                               |
| NFR-6  | Scalability                | The system should support an increasing number of users and software requests without performance degradation.                                                     |
